

--sent 8/19/20--

LPS Families,

Our work continues in preparation for the official *Return to Learn* on **Tuesday, September 8, 2020**. We wanted to take this opportunity to share with you a few updates this evening.

- Our schools have been working hard in recent weeks preparing for the upcoming school year. Be looking for building-specific information to be shared with families soon. To view all of the important *LPS Return to Learn* information, [click here](#).
- Earlier this evening, the Clay County Public Health Center shared updated options involving Fall 2020 sports/activities. This update can be viewed by [clicking here](#).

LPS has now transitioned into having discussions with the Greater Kansas City Suburban Conference as we determine the number of districts within the conference, and of similar classifications to our high schools, that plan to continue with high contact activities being played this fall. Ultimately, data received from this process will inform us as to our path moving forward. It is our hope to be able to share additional information in the coming days.

Liberty Public Schools supports providing opportunities for our students to participate in extracurricular activities and understands the benefits these opportunities provide our learners. We also must continue our positive relationships with all of our health experts as we make it our top priority to provide our students and staff with safe and healthy environments.

Thank you for your continued patience and flexibility as we navigate through this challenging time, and have a nice evening!
